LIPID RECOVERY CREAM, GLYTONE

Utilizing a new compounding process, the newly improved Glytone Lipid Recovery Cream for post-procedure skincare is now lighter in texture, allowing for faster absorption into the skin. Exclusive to physicians, the cream is formulated with high levels of essential fatty acids, vitamins, and emollients for use post-procedure (chemical peels, lasers, microdermabrasion, and fillers). It also uses skin-restoring properties of Camelina oil, also known as Siberian oilseed, combined with rich emollients, such as Shea butter and Glycerin as well as pro-Vitamin A and Sodium Hyaluronate, to help restore the natural skin barrier, repair its fundamental functions, and protect against external aggressors. SKIN ACTIVE TRIPLE FIRMING NECK CREAM, NEOSTRATA

NeoStrata's Triple Firming Neck Cream is formulated to help reverse the visible signs of aging in the neck and décolletage area by building volume and firming sagging skin, the company says. A new addition to the Skin Active system, this anti-aging SynerG Formula 12.0 neck cream includes three clinically proven matrix building ingredients. Each active benefit is

intended to provide a unique action to deliver optimal lifting and smoothing of delicate skin in these difficult-to-treat areas. Pro-Amino Acid helps stimulate pro-collagen production in the skin's deep layers, while NeoCitriate helps promote new collagen. NeoGlucosamine builds the surrounding support matrix and also works as a gentle exfoliant that helps reduce the appearance of uneven pigment and age spots that often appear on the neck and in the décolletage. This clinically proven cream is fortified with apple stem cell extract to help protect and maintain the longevity of skin's essential cells, helping your skin to behave like younger skin. AGE REVERSE TONING NECK CREAM, EXUVIANCE

Exuviance Age Reverse Toning Neck Cream is a fast absorbing cream formulated to create a strong, supportive network to help lift away years, restoring youthful tone and definition to the neck area. Developed exclusively for the fragile neck and décolletage, this firming and exfoliating treatment helps correct the telltale signs of premature aging and UV over exposure. Lipo-Amino Acid and CitraFill® encourage a healthy collagen network, while NeoGlucosamine, a component of skin's natural filler, helps build the underlying support matrix, plumping and lifting slack skin, while diminishing dark spots and uneven pigment. Apple stem cell extract stimulates and helps preserve healthy skin cells for skin that looks and behaves years younger. Exuviance.com

LUMIXYL MOISTURELOCK SUNSCREEN, ENVY MEDICAL

Lumixyl MoistureLock Sunscreen SPF 30 features umbrellablock technology dual layer protection system. An

all-physical sunscreen, Lumiblock features a proprietary method of micronizing Titanium Dioxide (TiO₂), resulting in a sunscreen that applies invisibly, acting more like a moisturizing primer rather than a protective SPF. There's no unnatural sheen, no chalkiness, no slipperiness under makeup, and it blends seamlessly into all skin tones, the company says. The second layer of protection in Lumiblock comes from a component known as SymHelios 1031, which works by inhibiting penetration of UVB-mediated toxins into skin cells, thus preventing degradation of elastin and collagen. TARGETED SKINCARE LINE, SIMYSKIN

SimySkin launched its skincare line, which includes age-specific advanced scientific ingredients and formulations that correct, repair, and reverse signs of aging. SimySkin targets the top factors that age skin: time, environment, and stress throughout distinct age groups (18-25/ 25-45 and 45 plus). With signature ingredient Vitamin B12 and other natural ingredients like calendula, pomegranate extract, hyaluronic acid, cranberry oil and sage, SimySkin is formulated to promote skin repair and regeneration while helping prevent wrinkles, hydrating dry skin, and relieving inflammation.

SimySkin serums are based on an easy numbers system targeting specific age ranges. In addition to the serums, products that can be used by consumers of any age include Hydrating & Nourishing Face Moisturizer, Nourishing Eye Cream, Gel Cleanser Anti Aging for Her/Him, MicroExfoliating Toner for Her/Him, Soothing Toner, Exfoliating Scrub for Her/Him, Ultra Fine Scrub, and Deep Hydrating Mask. www.simyskin.com

REGENLITE TRANSFORM, CHROMOGENEX

The latest addition to the Chromogenex family, Regenlite Transform is designed for managing inflammatory skin conditions without discomfort, downtime, or residual cell necrosis. The device can be used to treat acne vulgaris, rosacea, eczema, psoriasis, spider veins, wound healing, and scar improvement. Regenlite Transform emits a unique laser light SmartPulse from a handpiece held close to the skin. For acne sufferers, the laser light kills and reduces the bacteria causing infection and simultaneously stimulates the natural repair mechanisms of the skin. The light penetrating into the blood vessels stimulates the body's natural response to produce collagen, enhancing skin rejuvenation and reducing wrinkles or acne scarring. To treat vascular lesions, Regenlite Transform uses a high energy beam that targets and destroys the blood vessels causing the blemishes, leaving healthy skin unharmed. Regenlite.com ■
